

J-TRAC HANGER SYSTEM, 5 ROBUST HANGERS

Colour: Hanger: Black Rail and endcaps: White Sustainability The J-trac hanger system, 5 robust hangers has a very long service life. The hanger should be sorted as plastic. Rails and end stops should be sorted as metal.

The J-trac hanger system, 5 robust hangers is a version of our patented hanger system, offering a durable and secure solution for hanging clothes in care environments with high safety demands.

- The hanger is designed to prevent self-harm and suicide attempts, and automatically detaches from the rail under abnormal load.
- The rail is sturdy and designed to reduce the risk of cords, ropes, or similar items being attached, enhancing safety.
- The hanger is strong, resilient, and made from robust materials suitable for heavy daily use in challenging environments.

The J-trac hanger system, 5 robust hangers is particularly suitable for all environments with elevated safety requirements, such as mental care, youth care and correctional facilities. The system can be mounted in the ceiling of a wardrobe or underneath a wall-mounted shelf. The system only works with the included hangers, which stops standard hangers or other items from being used. This reduces the risk of using products not adapted to safety environments in ways that could pose a danger—for instance, by breaking, being manipulated, or used for self-harm. Hanging clothes instead of folding them helps maintain order and provides a clear overview of personal belongings. It also helps preserve the shape and condition of garments. For the user, this can provide a sense of structure and control in everyday life—something that is especially valuable in a care setting. The J-trac hanger system, 5 robust hangers is delivered complete with 5 hangers, 1 rail, and 2 end stops. Patented design: Healsafe Interior Suitable for placement in patient rooms or communal areas.

PRODUCT DATA

Material

J-trac hanger, robust: Polyurethane Rail: Powder-coated aluminum End cap: Powder-coated aluminum

Maintenance

The rail and J-trac hanger robust can be cleaned using alcohol-based or standard cleaning agents. Technical Data HS-905 - J-trac hanger system, 5 robust hangers (5 hangers, 1 rail and 2 end caps.) Hanger: W 390 mm, H 170 mm. Weight 215g. Rail: W 560 mm (w end cap 580 mm). A hanger automatically detaches from the rail under a vertical load of approximately 3.9 kg. When five hangers are loaded simultaneously, they detach at a combined weight of around 13.6 kg. Tested by RISE, Sweden

Delivery

1 week. For special orders, the delivery time may vary. Please note that unforeseen events may affect delivery. For more information about the current delivery time at the time of order confirmation or prior to ordering, please contact us at info@healsafeinterior.com.

Warranty

Rail and end stops: Lifetime warranty. Applies under normal use. J-trac robust hanger: 2 year. Applies under normal use. Full warranty provided for manufacturing defects. For claims or complaints, please contact us at info@healsafeinterior.com

Manufacturing/Production

Sweden.

Installation

Mount the rail and end stops using safety screws JT-283. The J-trac hanger system is suitable for wardrobes up to 600 mm wide, but can also be adapted for larger widths. For narrower wardrobes, the rail can easily be cut to the correct length using a hacksaw. Installation instructions are included with the order or can be provided upon request.
