Variants: Safedine Gaffel, 25 st, Safedine Matkniv, 25 st, Safedine Sked, 25 st, Safedine Spork, 25 st, Safedine Tesked, 25 st

Safedine cutlery is developed to support safe mealtimes that prioritise both user comfort and safety in environments with high demands. Combining a discreet look with ergonomic function and high safety, these utensils represent a leading choice for environments with high safety requirements.

- **– The cutlery features a self-harm preventative design that flexes under pressure, making it suitable for environments with high safety requirements.**
- **– The cutlery is manufactured from highly durable, impact-resistant plastic, making it very difficult to break or manipulate into a potential weapon.**
- **– Tested to withstand at least 200 dishwasher cycles without compromising material quality.**

Safedine cutlery is particularly suitable for all environments with high safety requirements, such as psychiatric care, youth care, treatment centres and correctional facilities. Registered design. Sold in packs of 25.

The cutlery is made from a flexible yet strong plastic that helps reduce the risk of self-harm or inappropriate use, such as cutting or injuring.

The characteristic design with recesses reduces the amount of material that can be sharpened. The cutlery is intentionally slightly weakened at specific points to flex under higher pressure, thereby reducing the risk of stabbing.

Safedine cutlery is primarily intended for use with soft or processed foods and is likely the safest and most functional plastic cutlery option available for high-security environments.

As part of the Safedine Cutlery range, the Safedine Spork offers a smart two-in-one solution by combining the function of a spoon and fork in a single utensil. It reduces the number of items needed, streamlines mealtime routines, and minimises both handling and dishwashing. A practical and space-efficient choice for care environments where safety, simplicity and efficiency matter.

An alternative to the Safedine range, our Basic Safety Cutlery (grey) [länk] offers shape and handling similar to traditional metal cutlery, while still providing a high level of safety.

PRODUCT DATA

Material
HDPE (High density polyethylene).

Technical data
HSI 640 – Safedine fork, white – L 189 mm HSI 641 – Safedine knife, white – L 208 mm HSI 642 – Safedine spoon, white – L 194 mm HSI 643 – Safedine teaspoon, white – L 134 mm HSI 644 – Safedine spork, white – L 194 mm HSI 660 – Safedine fork, blue – L 189 mm HSI 661 – Safedine knife, blue – L 208 mm HSI 662 – Safedine spoon, blue – L 194 mm HSI 663 – Safedine teaspoon, blue – L 134 mm HSI 664 – Safedine spork, blue – L 194 mm

Delivery
2–4 weeks. Please note that unforeseen events may affect delivery times. For inquiries, quotes, or orders, please contact: info@healsafeinterior.com

Manufacturing/Production
Sweden.

Maintenance
Dishwasher safe.

Sustainability
Designed for repeated use. A reusable product refers to items with significantly longer lifespans than single-use alternatives. No changes in properties have been observed after 200 dishwasher cycles at 85°C. Can be recycled as plastic.

Warranty
1-year warranty against manufacturing defects.
