HSP451 H 770 mm, W 1445 mm, D 890 mm, Seat height 455 mm · Weight 74 kg

HSP452 H 770 mm, W 1940 mm, D 890 mm, Seat height 455 mm · Weight 82 kg

Colour: Aston is a durable faux leather textile (vinyl) with fluid-resistant and wipeable properties, making it ideal for environments with high hygiene and wear-resistance requirements. Highland features a woven texture that combines durability with a warm, homely feel. Both fabrics are well-suited for high-demand environments and cater to different needs. Both are available in a wide range of colours. Aston & Highland.

Also available as: Quadra PLUS, fåtölj, Quadra PLUS 2-sits soffa, Quadra PLUS 3-sits soffa

Quadra PLUS Armchair and Sofas are specifically designed for environments where stability, durability, and resistance to tampering or misuse are essential.

- Plywood-reinforced frame provides exceptional stability and strength for daily use
- Removable seat cushions allow for easy cleaning and maintenance
- Fully enclosed base eliminates the possibility of concealment

The Quadra PLUS range is well-suited for facilities with enhanced safety requirements, such as psychiatric care, correctional institutions, and youth care facilities. Carcass made from a mix of particle board and plywood with solid beech wood feet. Strong plywood reinforcement offers excellent levels of durability and strength. Cushioned areas made from fire retardant, CMHR (combustion modified high resilience) foam is safe for both users and staff. All models are completely free from stitched piping and staples — a construction method that minimizes the risk of self-harm. The furniture's relatively high weight ensures it remains securely in place and is difficult to move, overturn, or misuse in ways that could pose harm to people or surroundings. The furniture can be customized to match specific interior design schemes through the selection of fabrics and colors. We recommend Aston or Highland fabrics for optimal durability and visual appeal. Recommended for use in patient rooms, communal areas, and shared living spaces.

PRODUCT DATA

Material

The frame is constructed from a combination of particleboard and plywood, further reinforced with additional plywood for enhanced durability. All upholstered components are securely fixed to the base to prevent removal. The core consists of CMHR (Combustion-Modified High Resilience) fire-retardant foam, ensuring safety for both users and staff. Legs are made of solid beech wood.

Sustainability

Fire retardant to BS7176:2007 source 5 a Strength and stability tested to BS EN 15373:2007 a Strength tested to BS 4875 a Seat static weight tested to 200kg The fabrics are flame-retardant in accordance with CAL TB 116, 117 and NFPA 260 (USA). Reupholstering furniture is a sustainable and cost-effective way to extend the product's lifespan. Contact us for guidance.

Maintenance

To maintain the condition of the sofa, we recommend cleaning it with a damp cloth and using mild cleaning agents if necessary. All materials are designed to be durable and easy to maintain, making them ideal for demanding environments. Surface disinfection can be used when required, but please note that frequent use may shorten the lifespan of the upholstery fabric. For more details, please refer to our Furniture Care Instructions ([link](#)).
