

WHITEBOARD ROYA & ARAM

HSI878 H 600 mm, W 800 mm, D 24 mm

HSI824 H 600 mm, W 800 mm, D 24 mm

Colour: The product is available with laminate walnut and with laminate in ash. Other laminate options are available upon request.

Our whiteboard is part of a furniture range developed for environments with high safety requirements. The range includes solutions for sleeping, studying and storage, all of which can be adapted to meet the needs of different facilities. The whiteboard combines high levels of safety and functionality with an attractive design.

- Durable writing surface for everyday use with whiteboard markers
- Frame with chamfered edges and secure wall fixing to help reduce ligature risks
- Manufactured in Sweden using natural materials

The Whiteboard is particularly suitable for secure youth care, residential treatment homes, correctional facilities and LSS accommodation, but is equally well suited to other environments with high safety requirements. Suitable for installation in patient rooms and communal areas. Available in two different colours / finishes *Roya laminate ash* or *Aram laminate walnut*

PRODUCT DATA

Material

Frame made of plywood with a laminated surface. The whiteboard surface is made from Formica® High Pressure Laminate (HPL)

Maintenance

The surface of the frame should be cleaned with a mild liquid detergent and a soft, clean cloth using circular motions. Rinse with clean water and dry with a soft cloth. For more persistent dirt, a soft nylon brush may be used in the same manner. Alcohol-based disinfectants may be used on laminate surfaces if necessary. Never use abrasive cleaning agents or rough tools such as scouring pads, as they may scratch and damage the surface. Check regularly to ensure that all visible screws are properly tightened and that no gaps have formed. Clean the surface regularly using a soft cloth and lukewarm water. If necessary, use a mild detergent. Always use dry-erase markers intended for whiteboards and remove writing regularly for the best performance. Avoid abrasive cleaners, scouring pads and other abrasive cleaning tools, as these may damage the surface and reduce its performance over time.

Sustainability

The product is made from plywood, a strong and durable material that ensures a long service life. The whiteboard surface is made from Formica® High Pressure Laminate (HPL), a hard-wearing material with a hard, scratch-resistant surface designed for everyday use. The surface is easy to clean, resistant to wear, and retains its appearance over time, making the product a durable and practical choice for demanding environments. The plywood frame should be recycled as wood. The Formica® High Pressure Laminate (HPL) whiteboard surface should normally be disposed of as combustible residual waste.

Delivery

Delivery time is 8–12 weeks. Please note that unforeseen events may affect the delivery schedule. For inquiries, please contact us at info@healsafeinterior.com

Warranty

The warranty period for our products made from laminated plywood with treated edges is 2 years from the delivery date. During this time, the warranty covers any manufacturing defects, material faults, and surface treatment issues. The warranty also covers installation-related faults when the product has been installed by Healsafe Interiör's appointed or in-house installers. The warranty covers the following areas:

Manufacturing defects: Any defects caused by production or material faults

Delamination: Separation of laminate layers due to faulty adhesive or process

Surface treatment: Defects such as peeling, staining, or deterioration in appearance due to treatment errors

More product information

The whiteboard features a durable writing surface that makes it easy to write, erase and update information. It provides a clear space for timetables, notes and other visual information that helps create structure and supports everyday communication. The frame is manufactured from durable laminated plywood with chamfered edges that help reduce ligature risks. The whiteboard is installed using security screws and is designed to prevent removal from the wall, making it suitable for environments with high safety requirements. Available in one size: 800 mm wide × 600 mm high. The design is carefully considered and aesthetically appealing, creating safe and welcoming environments without drawing attention to the integrated safety features. The range of familiar interior accessories, including hook rails and mirrors, is now also available in the Aram and Roya collections. These complement the fixed furniture range, making it easier to create safe, functional and aesthetically pleasing environments for both service users and staff.

Manufacturing/Production

Sweden.

Installation

The whiteboard is delivered assembled. The whiteboard is mounted with security screws. Make sure that the whiteboard is mounted on a flat wall surface to avoid gaps between the mirror and the wall.
