

ROCK CHAIR

Pineapple

HSP258 H 810 mm, W 520 mm, D 520 mm, Seat height 460 mm · Weight 7.5 kg

Colour: Solid lacquered birch with white plywood seat.

Rock chair is a robust and thoughtfully designed wooden chair, developed for environments where durability, safety and functionality are essential.

- The chair features cross-braced wooden runners instead of legs, providing added stability and making it easy to handle.
- The one-piece seat and backrest feature a durable laminate surface that is easy to clean.
- The solid birch frame ensures long-term durability in demanding settings.

The chair is especially suitable for psychiatric care, youth care, correctional facilities and other environments where high standards of safety, resilience and reassurance are required. With its clear design language and durable materials, the Rock chair creates a safe and secure atmosphere without feeling institutional. One of its key safety advantages is the use of runners instead of traditional chair legs. The runners form a continuous, rigid base that helps minimise the risk of damage to both the chair and its surroundings. The low centre of gravity also makes the chair more difficult to throw or use as a weapon compared to a standard wooden chair with four legs. The base is made of lacquered solid birch, while the seat and backrest are moulded plywood with a durable white laminate finish – a combination that ensures longevity in high-use public spaces. It is worth noting that natural materials like wood are often perceived as calming and welcoming – a quality that can contribute to a sense of safety and recovery in care environments. The Rock chair can be perfectly paired with the Rock coffee table [\[link\]](#), Rock dining table [\[link\]](#), and complemented with the Rock seat cushion [\[link\]](#) for added comfort and a cohesive interior design. Please note: Rock chair is sold in packs of 2. Suitable for patient rooms and communal areas such as dining rooms.

PRODUCT DATA

Material

Frame made from solid birch with seat in plywood with a laminate surface.

Technical data

Sold in pairs.

Delivery

8–12 weeks. Please note that unforeseen events may affect the delivery time. For up-to-date delivery information at the time of order confirmation or before placing an order, please contact us at info@healsafeinterior.com.

Maintenance

Easy to keep clean with a soft, damp cloth. A non-abrasive cream cleaner may be used. Do not use solvents, bleach, abrasives or synthetic cleaning agents. Avoid exposing the product to moisture – if it becomes wet, dry it thoroughly.

Sustainability

Strength and stability tested according to BS EN 16139:2013 Level 2, meaning the product is approved for demanding public environments. The test exceeded the approved limit of 200,000 cycles by an additional 300,000 cycles, demonstrating exceptional durability. The seat and backrest have also been tested in accordance with EN 1728:2012 section 6.4 to withstand a load of 317 kg (50 stone). Sort as wood for recycling.

Warranty

5 years. Applies under normal use Full warranty against manufacturing defects.

Manufacturing/Production
Europe.

Assembly
No assembly required.
