Rock dining table is a robust and thoughtfully designed table made of solid birch, developed for environments where durability, safety and long-lasting performance are essential. The sturdy construction combines carefully selected natural material with functional details that withstand heavy wear over time.

- Strong solid birch frame with reinforced legs and stable interconnections
- White laminate top that is heat- and impact-resistant
- Smooth bevelled edge that protects the tabletop and reduces the risk of injury or damage if someone falls or if the table is tipped over.

Rock dining table is particularly suitable for mental health care, supported housing services, youth care, correctional facilities and other challenging environments where specific demands are placed on safety, security and durability. The key to the strength of the range is its well-considered construction, where each leg is connected by cross-bracing that creates an extremely stable solid birch frame. This solution maximises durability, minimises the risk of warping over time and provides a solid feel that withstands intensive use without compromising safety. The tabletop copes with everyday heat from plates and cups, but hot cookware should be placed on protective mats. With its harmonious design language, the table creates a reassuring and caring atmosphere without feeling institutional. It is worth noting that natural materials such as wood are often perceived as calming and inviting – a quality which, in care environments, can contribute to increased security and recovery. Rock dining table is available in round, square and rectangular models in various sizes, a total of eight variants. It can be combined to great advantage with the Rock chair [länk] and the Rock coffee table [länk]. Suitable for living areas, dining rooms, patient rooms and other communal spaces.

PRODUCT DATA

Material

Frame made of solid birch and tabletop in laminate.

Maintenance

Easy to keep clean with a soft, damp cloth. A non-abrasive cream cleaner may be used. Do not use solvents, bleach, abrasives or synthetic cleaning agents. Avoid exposing the product to moisture – if it becomes wet, dry it thoroughly.

Technical data

HSP250: H 720 mm, 900 Ø. Weight: 25 kg. HSP251: H 720 mm, 1200 Ø. Weight: 35 kg.

Sustainability

Strength and stability have been tested in accordance with BS EN 16139:2013 level 2, which means the product is approved for demanding public environments. The test exceeded the approved threshold of 200,000 cycles by an additional 300,000 cycles, demonstrating exceptional durability. Statistically weight-tested up to 450 kg. Sort as wood for recycling.

Delivery

8–12 weeks. Please note that unforeseen events may affect the delivery time. For up-to-date delivery information at the time of order confirmation or before placing an order, please contact us at info@healsafeinterior.com.

Warranty

7 years. Applies under normal use Full warranty against manufacturing defects.

Manufacturing/Production

Europe.

Assembly

Top and base are easily assembled – just follow the included product instructions.
