SANITARY BIN, LW

- **– The sanitary bin releases from the wall bracket at abnormal vertical load**
- **– Light weight and relatively soft polypropylene that cannot be made sharp**
- **– Rounded corners for hygiene and reduced risk of injury**

The sanitary bin is designed to take the weight of sanitary waste products but when additional risk force is applied it releases from the bracket. For use with a disposable paper bag or similar. The design of the wall bracket prevents creating a ligature by preventing the attachment of a string or similar.. ***Design: HealSafe Interiör***
