

BATHROOM SHELF WHITE + 2 GLASSES

- The bathroom shelf releases from the wall bracket at abnormal vertical load
- Strong and durable plastic that cannot be made sharp
- Large radius corners for hygiene and reduced risk of injury

The bathroom shelf is designed to take the weight of ordinary personal care products but when additional risk force is applied it releases from the bracket. The design of the wall bracket prevents creating a ligature by preventing the attachment of a string or similar. *Design: HealSafe Interiör*
