

## SHOWER SHELF

**Colour:** White as standard. Can also be offered in a customised colour on request.

**Also available as:** Duschhylla, kundanpassad färg, Duschhylla, vit

*A safety-enhancing and user-friendly shower shelf that combines security, functionality, and clean design. Developed for environments where safety is essential, it contributes to a secure and hygienic bathroom setting.*

- Releases from the wall bracket under risk load, reducing the risk of accidents
- Made of strong and durable plastic that cannot be sharpened into dangerous edges
- Rounded corners for easy cleaning and reduced risk of injury

The shower shelf is particularly suitable for all environments with high safety requirements, such as psychiatric care, youth care, treatment centres and correctional facilities. Suitable for both private and shared bathrooms

### PRODUCT DATA

#### Material

Plastic

#### Maintenance

The shower shelf can be cleaned with a soft cloth and mild liquid detergent. If necessary, it can be disinfected with alcohol-based cleaning agents. Never use cleaning products containing abrasives or sponges with rough surfaces.

#### Technical data

Dimensions: H 100 mm, W 210 mm, D 100 mm

#### Sustainability

The design and material of the shower shelf are carefully chosen to extend the product's service life. Vertical load tests show that both the shower shelf and the wall bracket release under a load of 11 kg with a cord. The product has been tested by RISE/SP to withstand 1,000 releases while still retaining its shape and function. To be recycled as hard plastic.

#### Delivery

Delivery time: 1 week Please note that unforeseen events may affect the delivery schedule. For current delivery times at the point of order confirmation or prior to placing an order, please contact us at [info@healsafeinterior.com](mailto:info@healsafeinterior.com)

#### Warranty

3 years. Applies under normal use. Full warranty is provided for manufacturing defects.

## **Manufacturing/Production**

Sweden

## **More product information**

The shower shelf is designed to hold the weight of common hygiene and care products. The base has drainage holes for effective water run-off, keeping it hygienic and easy to clean. If anything is attached to the holes or if the shelf is subjected to abnormal load, it automatically releases from the bracket to prevent accidents and eliminate risks. The wall bracket is designed with chamfered edges and flexible holders that prevent cords or straps from being attached – a measure that reduces the risk of self-harm and increases safety. The shelf helps maintain order and cleanliness in the shower, as shampoo and other bottles do not need to be placed on the floor. This reduces the risk of slips and falls, while also making showering easier since you avoid bending down to pick up products – a more hygienic and ergonomic solution. The construction has been tested to withstand repeated stress without losing its function. Vertical load tests show that both the shelf and the wall bracket release at 11 kg load with a cord. The product is quality-assured by RISE/SP and developed in close collaboration with Region Hovedstadens Psykiatri in Denmark. Designed and manufactured in Sweden to meet high standards of safety, quality, and hygiene. It is also designed to harmonise with other products in the range, such as the toilet paper holder and bathroom shelf, creating a cohesive and functional environment – while at the same time giving the bathroom an aesthetic lift and contributing to a more pleasant atmosphere.

## **Mounting**

The shower shelf must be mounted against a completely flat surface to ensure a tight and stable connection between the bracket and the wall. This minimises the space behind the wall bracket and thereby prevents the possibility of attaching cords, straps, or similar objects that could be used for self-harm. The wall bracket is mounted with security screw JT-271. Installation must be carried out in accordance with the installation instructions
