RYNO Dining chair / OPTIONS

When ordering a *RYNO dining chair*, there are a few choices to consider. Some choices affect delivery times and price, while others have an impact on where and how the chair is to be used. The choices are important to ensure that the chair meets requirements and expectations. To make the choices a little easier before an order or request, we have made a compilation of the options available.

COLOUR

RYNO chair is available in *10 colors*. 5 of these are included in the standard range called **CORE**. All of these colors are stocked.

The other 5 colors (**OPTIONAL**) have a slightly longer delivery time. These 5 colors have an additional cost of approx. *12%* compared to CORE.

CORE

GRANITE MOONWALK GREY EPIC BLUE COOL GREEN ICON PURPLE

OPTIONAL

BLAZE ORANGE VEGAS YELLOW LIME GREEN BLACK THUNDER GREY

WEIGHT

Choose weight based on the situations in which the patient / client should use the chair. *See pros and cons for different choices below.*

LIGHT WEIGHT (12 KG)

- *Easy to move*
- Limited damage to the environment if the chair is thrown away (*the chair does not break!*)

WEIGHTED (UP TO 75 KG)

- Very difficult to lift and throw. The rounded shapes in combination with the high weight make the chair very difficult to grip.
- Great damage to the environment *if* a strong person despite the high weight is able to lift and throw the chair.
- Additional cost for weighting.

FLOOR FIXING

- *Impossible* to lift and throw.
- Provides a patient environment with limited autonomy.
- *Additional cost* for fittings.

Interiör**

SEAT CUSHIONS

Our recommendation is to choose a separate cushion that easily can be replaced if needed. *If a fixed cushion is damaged, the entire chair must be replaced.*

INDOORS/OUTDOORS

RYNO dining chair is just as suitable indoors as outdoors. For outdoors use a *drainage hole* is drilled in the seat.
